Offer certain CLASS features, AIN	)	
Features, Custom Calling Features	)	UTILITY DIVISION
listings and packages as not regulated	)	DOCKET NO. D2006.3.39

NOTICE OF FILING

Qwest Corporation ("Qwest") by and through undersigned counsel, hereby respectfully submits this Notice of Filing at the direction of the Public Service Commission provided to Qwest at the Commission's work session on April 6, 2006. This Notice of Filing replaces the previous filing submitted by Qwest on March 27, 2006.

The Notice of Filing serves as notice of Qwest's intent to begin offering certain CLASS features, Custom Calling features, AIN features, listings and packages as not regulated effective July 8, 2006. These features, listings and packages fall outside of the definition of a "regulated telecommunications" service as defined in Section 69-3-803(10)(a) of the Montana Telecommunications Act. Section 69-3-803 defines regulated telecommunications service as "two way switched voice grade access and transport of communications originating and terminating in this state and non-voice grade access and transport if intended to be converted to or from voice grade access and transport."

This Notice of Filing hereby incorporates the original filing and Attachments A through F, all of which are attached hereto, and which provide the documentation and certifications required by Commission rules.
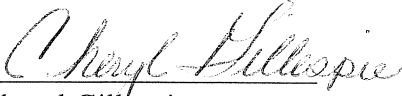

Dated this 10th day of April, 2006.

Submitted:

Dennis R. Lopach
Attorney for Qwest
Gough, Shanahan, Johnson, & Waterman

CERTIFICATE OF SERVICE

I HEREBY CERTIFY THAT A COPY OF THE Notice of Filing to refile the Notification of the Offering of certain Qwest features and packages as not regulated originally filed on March 27 has been served on all the parties designated on the current Telecommunication Service (TELGEN) list by mailing a copy thereof to each party by mail, or hand delivery, postage prepaid. The attachments to this filing provided with the original filing were not resent but can be made available on request. The complete package of this refilling was sent to the PSC and to the Montana Consumer Counsel.

Dated this 10th day of April 2006.

<div style="text-align:center">RE: Notification of Certain Features, Listings and Packages to be offered as not regulated.</div>

Dear Kate:

Please consider this letter as Qwest's notification of its intent to begin offering certain CLASS features, Custom Calling features, AIN features, listings and packages (see Attachment A) as not regulated effective June 25, 2006. These features and packages are currently offered in Qwest's Montana service territory (certain AIN features are limited to specific geographic areas due to technical limitations).

These features, listings and packages fall outside of the definition of a "regulated telecommunications" services as defined in Section 69-3-803(6)(a) of the Montana Telecommunications Act. MTA 69-3-803 defines regulated telecommunications service as "two-way switched voice grade access and transport of communications originating and terminating in this state and non-voice grade access and transport if intended to be converted to or from voice grade access and transport". Attachment B provides the technical explanations and detail as to why these features, listings and packages listed on Attachment A fall outside of this definition.

Additional information is attached as Attachments C, D, E and F. Attachment C is a more detailed description of each feature, listing and package to be offered as not regulated. Proprietary Attachment D contains the business and residence quantities in service for each feature, listing and package as of October, 2005 under the terms of the term protective order on file with the PSC. Attachments E and F are certification that this notification has been served on all parties designated on the current Telecommunications Service (Telgen) list and that all potential customers are being notified.

Prior to offering these services as not regulated, all current customers for these features, listings and packages will receive notification.

Please direct questions and comments concerning this filing to Cheryl Gillespie on 406-441-7144. Please send copies of all written inquiries, correspondence, staff memoranda, notice or pleading on this issue to Cheryl at Qwest, P.O Box 1716, Helena, NT 59624and to Dennis Lopach, Attorney-at-Law, 33 S. Last Chance Gulch, P.O. Box 1715, Helena, MT.

Sincerely,

Montana President

The state of Montana defines regulated telecommunication service in Section 69-3-803(6)(a) of the Montana Telecommunications Act as " two–way switched, voice grade–access and transport of communications originating and terminating in this state and non-voice grade access and transport if intended to be converted to or from voice grade access and transport."

Under this Montana statute definition, only basic Qwest originating and terminating voice grade service i.e. 1FR and 1FB, voice or data, should qualify as a regulated telecommunications service.

Some of Qwest's other residential and business tariffed products in Montana including Custom Local Area Signaling Service (CLASS), Advanced Intelligent Network (AIN) enabled services, Custom Calling Services and Listings fall outside the Montana definition of a regulated telecommunication service.

All of the aforementioned services or features function solely as adjuncts to underlying regulated basic voice access and transport. These services (CLASS, AIN enabled services and Custom Calling) act as call management products to provide improved control over the basic telephone call for the subscriber. None of these products serve any function in the provision of basic telecommunications access or transport. All of these services use switch based and intelligent network features and technology to provide their functionality. These features and technology are an addition to and not an integral component in providing basic voice grade access and or transport. None of these services therefore fall under the Montana statue definition of a regulated telecommunications service.

In the case of directory listings, there is absolutely no connection with basic telecommunications access or transport. The alphabetical directory is simply a list of names of customers, joint users, and others for whom directory listings are provided. Alphabetical listings include information which is essential to the identification of the listed party and facilitates the use of the directory.

General Technical Overview

Signaling System 7 –Call Setup and Adjunct Functionality

Signaling System 7 (SS7) serves a dual function in the Qwest network to provide basic call setup as well as signaling information for call management services. For basic call processing, SS7 signaling provides call control for set up, supervision and release of calls. This SS7 function falls under the definition of regulated telecommunications service in the Montana Statue.

SS7 also provides service specific messaging functions including passage of the Calling Party Number for various call management services (CLASS, and AIN enabled services). This SS7 capability supports adjunct specific services that fall outside the Montana definition of regulated telecommunications service.

CLASS Services

CLASS is a set of call management switch based features, a majority of which provides the called party with control over incoming calls. The features are enabled by the ability to pass the calling party number to the terminating switch as part of the normal Signaling System 7 (SS7) call set-up. All of the CLASS features utilize the underlying SS7 infrastructure combined with specific end office switch software packages that provide the CLASS feature. The Calling Name functionality is provided by the Line Information Database (LIDB) which resides on the Intelligent Service Control Point (ISCP) platform. Names associated with a customer's directory number are retained and updated as required in the Line Information Database (LIDB) application.

The SS7 infrastructure consists of Signal Transfer Points (STPs), Intelligent Service Control Points (ISCPs), SS7 signaling links and end office switch Service Switching Point (SSP) hardware and software. The STP routes all messages between the ISCP and the SSP and performs message translation. STPs are deployed in mated pairs at geographically different sites. The ISCP provides service logic and calling name database information. The SSP and ISCP use SS7 protocol to communicate over DS-0 (64 KBPS) signaling links. The customers calling number is transmitted to the terminating switch (switch serving the called telephone number) over the SS7 link during call processing. The terminating switch (SSP) launches an SS7 calling name query to the LIDB ISCP (Calling Name Database) via routing by the STP. If public and available, the name associated with the queried number is retrieved and transmitted back to the terminating switch using the SS7 signaling link. This name and number information is used in the service logic of numerous CLASS switch features (See Figure 1. CLASS Basic Architecture).

AIN Services

These services provide advanced call management services based on service specific feature logic contained on intelligent network service nodes (ISCP and ISP- Intelligent Services Peripheral). Messaging is sent over SS7 signaling links between the ISCP nodes and central office switches to execute feature functionality (See Figure 2. AIN Basic Architecture).

Custom Calling Features

These are switch-based features purchased from switching system vendors and provided as part of a central office switch generic software package. These vertical services provide improved call management functionality for customers. Switch hardware including switch memory and feature specific equipment such as three-port conference circuits is required. Dual Tone Multi-frequency (DTMF) signaling over the local loop between the Customer Premises Equipment and Central Office switch provides the subscriber feature control (See Figure 3. Custom Calling Basic Architecture).

Descriptions of Montana Features, Listings and Packages Not Regulated

What follows is a listing and description of the features, listings and packages that Qwest intends to offer as not regulated in the state of Montana. Individual Features are listed first, Listings second and Packages last. Each feature, listing or package name includes an indication if the service is obsolete as well as the USOC or USOCs associated with the feature, listing or package listed parenthetically after the name of the service. In addition, a parenthetical indication can be found following the USOC which indicates if the service is an Advanced Intelligent Network (AIN) Service, Custom Local Area Signaling Service (CLASS), Custom Calling (CC) Service or Listing (LIST) Service as defined in the Technical Justification. An indication is shown where a package contains multiple "types" of features. For example, Qwest Choice™ Home is a package of features available to residence customers that contains AIN, CLASS and Custom Calling features. The parenthetical expression provided is (AIN, CLASS, CC).

INDIVIDUAL FEATURES

Abbreviated Access – One-Digit and Two-Digit (USOCs EV4, EV5, EV8, EV9) (CC)

Allows a customer to place a call to a predetermined telephone number by dialing an abbreviated code. Two arrangements are available, namely, Abbreviated Access, one-digit or Abbreviated Access, two-digit.

The customer shares a speed call list with their Abbreviated Access provider and the provider controls the speed call list and informs clients of the digit(s) to dial to reach the predetermined telephone number.

Anonymous Call Rejection (USOC AYK) (CLASS)

Caller Identification customers who do not wish to receive blocked calls can activate Anonymous Call Rejection. While the feature is activated, incoming blocked calls are routed to an announcement in the central office.

Call Curfew (USOC RCU) (AIN)

Allows the customer the ability to block incoming and outgoing calls. The feature can be turned on and off manually or automatically by pre-set schedules which have been defined by the customer. Also available to residence customers as part of an obsolete offering named Custom Solutions (USOC RCU2X).

Call Following (USOC AFM) (See Remote Call Forwarding)

Call Forwarding Busy Line – Expanded (USOC FBJ) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number in a different central office switch if the called number is busy.

Descriptions of Montana Features, Listings and Packages Not Regulated

Call Forwarding Busy Line - External (USOC EVB) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number outside the customer's system but within the same central office switch if the called number is busy.

Call Forwarding Busy Line - Overflow (USOC EVO) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number within the same central office switch if the called number is busy.

Call Forwarding Busy Line - Programmable (USOC ERB) (CC)

Allows a customer to have incoming calls forwarded to another number when the called number is busy. The customer can activate and deactivate the forwarding feature by dialing a code as well as establish or change the number to which calls will be forwarded.

Call Forwarding Busy Line/Don't Answer - Expanded (USOC FVJ) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number in a different central office switch if the called number is busy or if the customer does not answer after a preset number of ringing cycles.

Call Forwarding Busy Line - External/Don't Answer (USOC EVF) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number outside the customer's system but within the same central office switch if the called number is busy or to any number within the same central office switch if the called number does not answer.

Call Forwarding Busy Line - Overflow/Don't Answer (USOC EVK) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number within the same central office switch if the called number is busy or does not answer.

Call Forwarding Don't Answer (USOC EVD) (CC)

Allows a customer to have incoming calls forwarded to another number within the same central office switch if the customer does not answer after a preset number of ringing cycles.

Call Forwarding Don't Answer - Expanded (USOC FDJ) (CC)

Allows a customer to have incoming calls forwarded to another predetermined number in a different central office switch if the customer does not answer after a preset number of ringing cycles.

Call Forwarding Don't Answer -Programmable (USOC ERD) (CC)

Allows a customer to have incoming calls forwarded to another number if the customer does not answer after a preset number of ringing cycles. The customer can activate and deactivate the forwarding feature by dialing a code as well as establish or change the number to which calls will be forwarded.

Call Forwarding Variable (USOC ESM) (CC)

Allows a customer to automatically forward all incoming calls, during the period of time this feature is activated, to another telephone locally and, depending on CO capabilities, on a long distance basis. Call Forwarding - Variable, for PBX customers, will only work on one trunk at a time. The feature will also remove that trunk from rotary hunting service during its use. Also available to residence customers as part of an obsolete offering named Custom Solutions (**USOC NLRXZ**).

An option is also available that allows a customer to activate the feature without completing a call to the forward-to number (**USOC FOQ**).

Call Rejection (USOC NSY) (CLASS)

Enables a customer to reject call attempts from up to 15 numbers of calling parties by dialing a code and the telephone numbers of calls to be rejected. Any call attempts to the customer from these numbers will be prevented from terminating to the customer and will instead be connected to an announcement informing the caller that the call is not presently being accepted by the called party. A customer may also reject future calls from the most recent call received by dialing a code after completing the call. Also available to residence customers as part of an obsolete offering named Custom Solutions (**USOC NLRXO**).

Call Trace Pay-Per-Use (USOC N/A) (CLASS)

Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only. After receiving the call that is to be traced, the customer dials a code and the traced telephone number is automatically sent to the Company for future action.

Call Transfer (USOC EO3) (CC)

Enables a customer to transfer an incoming call to a third party or add a third party to an existing call, forming a three party connection, and then to leave the connection without disconnecting the call.

Call Waiting (USOC ESX) (CC)

When a customer is talking on the telephone, a short spurt of tone signals him that a call is waiting. Only the Call Waiting customer hears the tone, while the incoming caller hears a regular ringing signal. Flashing the switchhook holds the first call while the second is answered. The customer can alternate between calls by flashing the switchhook.

The customer prior to or during any call can temporarily cancel call waiting by dialing a specific code. Incoming calls will receive a busy signal. Upon disconnecting from the call in progress, normal call waiting is automatically restored.

Call Waiting ID (USOC N2W) (CLASS)

A customer with Caller Identification may also receive name and/or number information on a call that is waiting. (The customer must have the appropriate CPE.)

Caller Identification Blocking – Per Call (USOC N/A) (CLASS)

Enables a customer to control the disclosure of his/her name and/or telephone number to a subscriber of Caller Identification (where technically feasible) by temporarily changing the public/private status indicator of the telephone number. A customer must dial a code, *67 or 1167 on rotary phones, before each call to change the indicator from public to private. "Public Status" allows delivery of the name and/or telephone number. "Private Status" prevents delivery of the name and/or telephone number.

Caller Identification Blocking – Per Line (USOCs NKM, NKS) (CLASS)

Provides a permanent private indicator on a customer's line. Once blocking is established on the customer's line, the private status can be deactivated by the customer by dialing a code, *82 or 1182 on rotary phones, before each call, to change the indicator from private to public. This one call unblock allows the name and number to be sent for that one call only.

Caller Identification – Bulk (USOCs FCX, NSE++, CGL) (CLASS)

Caller Identification-Bulk (BCLID) allows a Centron®, Centrex, Multiline Hunt Group (MLHG) or Private Branch Exchange (PBX) customer to receive call-related information on calls that are received from outside the Centron®, Centrex, MLHG or PBX.

Caller Identification – Name and Number (USOC NNK) (CLASS)

Allows for the automatic delivery of a calling party's name and telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The name and number are displayed on customer provided equipment.

Caller Identification – Number (USOC NSD) (CLASS)

Allows for the automatic delivery of a calling party's telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The number is displayed on customer provided equipment.

Caller ID with Privacy +® (USOC N6S) (AIN)

Includes the Caller Identification - Name and Number functionality and, in addition, provides the customer with the ability to screen private and unidentified calls that are placed to their number.

Continuous Redial (USOC NSS) (CLASS)

Allows a customer to dial a code that will cause the feature to automatically redial the last number the customer dialed. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called number becomes available. Also available to residence customers as part of an obsolete offering named Custom Solutions (USOC NLRXL).

Continuous Redial Pay-Per-Use (USOC N/A) (CLASS)

Allows a customer to dial a code that will cause the feature to automatically redial the last number the customer dialed. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called number becomes available. Customer charged on a per-use basis rather than monthly.

Custom Ringing (USOCs RGG1+, RGG2+, RGG3+) (CC)

A central office based service that provides up to three distinctive ringing codes on incoming calls, using one individual access line. The distinctive ringing codes are achieved by assigning up to three additional telephone numbers to the access line. Also available to residence customers as part of an obsolete offering named Custom Solutions (**USOC NLQ1+**).

Dial Call Waiting (USOC WDD) (CC)

Allows a customer with a line equipped with the feature to direct a Call Waiting tone or a Distinctive Alert signal to a line equipped with Distinctive Alert. Dialing a preset access code and the telephone number of the line to which the signal is directed activates the feature.

Dial Lock (USOC OC4) (AIN)

Allows a customer the ability to manager their outbound calls (local, local long distance, and toll) by selectively blocking different types of calls placed from their line. This service will allow blocking to all non-emergency local calls; long distance calls; international calls; operator assisted; toll free; information services; and directory assistance calls. The customer will select the types of calls they wish to have blocked. Customers may override the blocking at anytime through a personalized assigned PIN code.

Directed Call Pickup (USOC PUN) (CC)

Allows a customer to answer a call, during the ringing cycle that is directed to another line by dialing a preset access code and the telephone number of the line to be answered. Both the originating line and the line to be answered must be equipped with the feature.

Directed Call Pickup with Barge-In (USOC PUQ) (CC)

Allows a customer to answer a call directed to another line which has been answered or is ringing by dialing a preset access code and the telephone number of the line to be answered. Both the originating line and the line to be answered must be equipped with the feature.

Distinctive Alert (USOC DHA) (CC)

Allows a customer to receive an audible Call Waiting tone or Distinctive Ringing signal from a line equipped with Dial Call Waiting. If the called line is idle, a Distinctive Ringing signal will be heard. If the called line is busy, the called line receives a Call Waiting tone.

Do Not Disturb (USOC D7T) (AIN)

Allows a customer to prevent the ringing of their telephone. When the feature is activated, callers hear a customer selected greeting indicating that the customer is not available. If the customer has messaging service the caller may stay on the line and leave a message.

Easy Access (USOC SQAVX) (AIN)

Allows a customer to place a call to a predetermined telephone number by dialing an abbreviated two-digit code. The dialing code is *98.

Hot Line (USOC HLA) (CC)

Allows a customer to establish a switched connection to a predetermined number when the customer's telephone goes off-hook. No dialing is required and the call is processed automatically to the predetermined telephone number.

Hunting (USOC HTG) (CC)

An optional arrangement available to customers with two or more individual line services. Where facilities permit, such lines will be arranged so that incoming calls to a busy line will overflow to other of the customer's lines not busy.

I-Called Pay-Per-Use (USOC N/A) (AIN)

Allows for callers who encounter a "ring no answer" condition to record their name and telephone number for future delivery to the called party.

IntraCall® (USOC E1N) (CC)

Allows an individual access line, noncomplex residence or business customer to use the line as an intercom system. This feature is activated when the customer dials their own number from any station on the line, receives a busy signal and hangs up. Upon hanging up, all stations on the line will ring. Two or more stations may speak over the intercom line.

Last Call Return (USOC NSQ) (CLASS)

Allows a customer to dial a code that will cause the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. The customer does not have to know the number of the calling party. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available.

Last Call Return Pay-Per-Use (USOC N/A) (CLASS)

Allows a customer to dial a code that will cause the feature to automatically redial the number of the last incoming call to that line, whether the call was answered or not. The customer does not have to know the number of the calling party. If the called number is busy, the feature will redial the called number for a limited period of time. A tone alerts the customer when the called line is available. Customer charged on a per-use basis rather than monthly.

Long Distance Alert (USOC LWE) (CC)

A customer who subscribes to Call Waiting may enhance their service to separately identify local and long distance calls. Different tones will distinguish the two types of calls, whether at the initial ring cycle or in the call waiting mode.

NextConnects℠ (USOC C7QPA) (AIN)

An optional feature that allows a customer to control the handling of incoming calls when their line(s) is busy. If the called number is busy, the feature allows calls to be placed in queue until the line(s) is available.

No Solicitation℠ (USOC SB5) (AIN)

Allows a customer to deter sales and telemarketing calls received by the customer. This is accomplished via a recorded message which informs the caller that the customer does not accept telephone solicitations, and asks solicitors to hang up and to place the called party on the solicitors "do-not-call" list.

Priority Call (USOC NSK) (CLASS)

Allows a customer to assign a maximum of 15 callers' telephone numbers to a special list. The customer will hear a distinctive ring at his/her location when calls are received from callers' telephone numbers on that list. Also available to residence customers as part of an obsolete offering named Custom Solutions (**USOC NLRX8**).

Remote Access Forwarding/Call Following (USOCs AFD, AFM) (AIN)

A function which allows all incoming calls to be forwarded to another telephone number. It allows the customer to remotely change the termination of their incoming calls. From any tone signaling telephone, the customer can activate, deactivate, or change the destination number. The feature is known as Call Following for residence customers. Also available to residence customers as part of an obsolete offering named Custom Solutions (**USOC NLUAA**).

Scheduled Forwarding (USOC ATF) (AIN)

A function which allows all incoming calls to be forwarded to another telephone number. It allows a customer to remotely change the termination of their incoming calls and base the termination upon a time schedule. From any tone signaling telephone, the customer can activate, deactivate, or change the times, days and destination numbers. Also available to residence customers as part of an obsolete offering named Custom Solutions (**USOC NLUAB**).

Security Screen® (USOC RV1) (AIN)

Provides the customer with the ability to screen private and unidentified calls that are placed to their number. A customer who subscribes to Security Screen® must also subscribe to Caller Identification – Name and Number.

Descriptions of Montana Features, Listings and Packages Not Regulated

Selective Call Forwarding (USOC NCE) (CLASS)

Allows a customer to specify a special list of a maximum of 15 telephone numbers. Incoming calls placed to the customer from telephone numbers on that list will automatically be forwarded to a predefined telephone number. All other calls will be handled normally. Also available to residence customers as part of an obsolete offering named Custom Solutions **(USOC NLRXN)**.

Selective Call Waiting (USOCs S7W, S7Y) (AIN)

Includes the Call Waiting or Call Waiting Identification functionality and, in addition, allows the customer to establish and modify a list of telephone numbers that trigger the Call Waiting tone when the customer's line is in use. Calls from telephone numbers not on the list, or calls from unidentified callers will either hear busy tone when the customer's line is busy or if the customer subscribes to Voice Mail service, the call will be routed to the customer's mailbox.

Speed Calling – 8 or 30 Number (USOCs E8C, E3D) (CC)

This provides for the calling of a 7- or 10-digit telephone number by dialing an abbreviated code. Two arrangements are available, namely, an 8-number capacity and a 30-number capacity. Speed Calling 8 Number is also available to residence customers as part of an obsolete offering named Custom Solutions **(USOC NLRXW)**.

Talking Call Waiting (USOC TW1) (CC)

An enhancement that provides an audible announcement of the incoming caller's name. The audible announcement consists of the regular Call Waiting tone followed immediately by the calling party's name.

Three-Way Calling (USOC ESC) (CC)

Enables a customer to add a third customer on an established local or long distance connection without operator assistance. The customer initiating the Three-Way Calling on either a local or long-distance basis may call the third customer. Also available to residence customers as part of an obsolete offering named Custom Solutions **(USOC NLRXR)**.

Three-Way Calling Pay-Per-Use (USOC N/A) (CC)

Enables a customer to add a third customer on an established local or long distance connection without operator assistance. The third customer may be called by the customer initiating the Three-Way Calling on either a local or long-distance basis. Customer charged on a per-use basis rather than monthly.

U S West® Receptionist (USOCs EWY2X, EWY2O, EWY29) (CLASS, CC)

Allows the customer to control the disposition of incoming calls while in an off-hook condition via a visual display unit.

Additionally, it allows for the automatic delivery of a calling party's name and/or telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The name and number are displayed on customer provided equipment.

Wireless Extension (USOC HME) (AIN)

A wireline forwarding service that works with a customer's wireless service. When a call is placed to the wireline number, it is automatically forwarded to a designated wireless number if the handset is turned on. If the wireless handset is turned off or is busy, the call rings at the wireline number and is not forwarded. In addition, any call coming from the designated wireless number to the wireline number will not be forwarded back to the wireless number.

LISTINGS

Additional Listing (USOCs CLT, RLT) (LIST)

An additional listing is a listing that is in addition to the primary main listing on the same telephone number for an individual entitled to the use of the customer's service. Also available to residence customers as part of an obsolete offering named Custom Solutions (USOC NLYXA).

Alpha Listing (USOC RNCAF) (LIST)

After the main listing is listed numerically, an alpha listing can be provided with all or part of the numbers being represented by letters of the alphabet (i.e. 441-ROSE).

Client Main Listing (USOC LBS, LRS) (LIST)

Customers-of-record who resell/share Basic Local Exchange Service may obtain main listings in the alphabetical section of the telephone directory for their patrons and/or clients.

E-Mail Address Listing (USOC EM6) (LIST)

Identifies the customer's electronic mail (E-Mail) address used to send and receive mail on a computer. An example of a standard E-Mail address is: userid@qwest.com. This listing is obsolete for business customers.

E-Mail/URL Address Listing (USOC L9GEU) (LIST)

Discounted monthly rate when customers purchase an E-Mail Address Listing and URL Address Listing on the same account. This listing is obsolete for business customers.

Descriptions of Montana Features, Listings and Packages Not Regulated

Foreign Listing (USOC FAL) (LIST)

A foreign listing is an additional listing that does not appear in the same directory/directory section as the primary listing. Also available to residence customers as part of an obsolete offering named Custom Solutions (USOC NLYXB).

Informational Listing (USOC XLL) (LIST)

An information listing is additional material (non-promotional in nature) that is included with a primary, additional or foreign directory listing and is necessary for the proper routing of calls. The primary or additional listing consists of the name, a designation or title, if appropriate, address (unless omitted) and a telephone number. Any information in addition to this is considered an informational listing. Also available to residence customers as part of an obsolete offering named Custom Solutions (USOC NLYXC).

Mobile Radio Listing (USOC L96) (LIST)

A listing for a Radio Carrier mobile radio customer in the Company's directory.

The Mobile Radio Listing must bear the same telephone number as the Carrier's connecting circuit, but may show the address of the customer or the address of the connecting circuit, as requested.

Mobile Unit Number Listing (USOC LMS) (LIST)

A listing for a Radio Carrier mobile radio customer in the Company's directory.

The listing may be the telephone number assigned to the customer or the individual Mobile Unit Number.

Nonlisted Service Listing (USOC NLT) (LIST)

A customer's listing that is omitted from the directory at the request of the customer but otherwise posted on the information records and the telephone number is given out upon request.

Nonpublished Service Listing (USOC NPU) (LIST)

A customer's listing that is omitted from the directory at the request of the customer and posted on the information records without a telephone number.

Special Reversed Charge Long Distance Listing (USOC ENU) (LIST)

A listing for customers who wish to extend to their patrons in distant exchanges the privilege of calling them "collect" without requesting the reversal of charges or waiting for the charges to be accepted.

Telephone Answering Service Bureau Listing (USOC 9FK) (LIST)

A business listing subscribed to by a Telephone Answering Service Bureau on its administrative service or a business listing on its DID service for those patrons of the bureau who do not maintain a place of business in the exchange and who do not have a requirement for service of their own.

Uniform Resource Locator (URL) Address Listing (USOC NL1) (LIST)

Identifies the customer's URL address used to identify resources on the Internet's World Wide Web. An example of a standard URL is: http://www.qwest.com. This listing is obsolete for business customers.

WATS Listing (USOC SZS) (LIST)

A listing of an 800 Service customer for each directory in which he/she wishes to have their inward access line listed.

PACKAGES

Call Manager Connection (OBSOLETE) (USOC NLUB+) (CLASS, CC)

A package of services available to business customers. The services in this package are defined by the Company but the customer does have the choice of including, at no additional charge, Call Waiting or the Call Waiting feature which meets their needs, e.g. Call Waiting ID or Qwest Receptionist. AFFIDAVIT

State of Montana)
) :ss.
County of Lewis and Clark)

     Cheryl A. Gillespie, Being first duly sworn upon her oath, deposes and says I am the Montana Regulatory Director for Qwest Corporation in Monana, and make this affidavit based upon my own personal knowledge.

     Qwest has prepared a bill insert to comply with the customer notice requirements set forth in the Commission's administrative rules, specifically ARM 38.2.2705(1)(f). A true and correct copy of the bill insert is attached to my affidavit as Appendix 1.

     Because of the large number of Montana customers which Qwest must bill each month, it uses a monthly billing cycle in which a portion of the total number of Monatna customers are issued their bills on each mailing day within the billing cycle. The first complete billing cycle after the filing in this docket is the billing cyle which begins on April 6, 2006, and ends on April 31, 2006. The bill insert attached as Appendix 1 will be stuffed into Qwest's Montana billings during that billing cycle. By the end of the cycle, every Montana customer who uses the services at issue in this filing will have been notified of the filing in accordance with ARM 38.2.2705(1)(f),
     In addition, all persons and organizations listed in the Commission's most recent TELGEN list have been served with a copy of this filing in accordance with Commission rule ARM 38.2.2706.

Dated March 27th, 2006

                            Cheryl A. Gillespie
                            Cheryl A. Gillespie

     SUBSCRIBED and SWORN To before me this 27th day of March 2006:

(SEAL)   Print Name _KATHERINE A Eyler_
                              Residing at Helena Montana
                              My Commission expires _10-24-08_

IMPORTANT INFORMATION

Notice of Filings for Deregulation

Qwest filed notice with the Montana Public Service Commission on March 27, 2006 of its intention to begin offering the services listed below as non-regulated services. This change in classification will not impact your service in any way and there is no action required on your part. If approved by the Commission, this classification change will take effect June 25, 2006.
